

iCan Screen 7"

Retractable Display - TFT Color LCD

iCan Screen 7" is a ruggedized retractable display specially designed for viewing multimedia contents (videos, moving map...) in the aircraft. Customizable software can be developed according to your specifications and then downloaded into the display. Product provides a multi-format video player (MP4, AVI...) and direct analog input sources. It is designed to be easily integrated into an iCan Systems® architecture for In-Flight Entertainment applications.

iCan Screen 7" is cushioned and equipped with an anti-glare system, providing a great visual comfort during flight.
