

iCan Screen 9"

HD Display 9" - TFT Color LCD
iCan Screen 9" is a multi-purpose ruggedized display specially designed for avionics applications.

Main Features

- Customizable software can be developed according to your specifications and then downloaded into the display.
- Product provides a multi-format video player (MP4, AVI...) and is designed to be easily integrated into an iCan Systems® architecture for In-Flight Entertainment applications.
- Designed to be rack-mounted, iCan Screen 9" is cushioned and equipped with an anti-glare system, providing a great visual comfort during flight.

Interfaces

1x Ethernet 10/100 BaseT
1x CAN 2.0
1x USB 2.0
1x stereo analog output (audio)
Rear connector : Micro Comp series 25 pins

Physical specifications

Size (LxWxH mm): 240,1x 137 x 31.1
Weight (g): 820

Typical application

- It is designed to be easily integrated into cabin for
 - In-Flight Entertainment,
 - displaying multimedia.

Display

Diagonal size: 9" (22,8cm)
Resolution: 1920 x 1080 pixels (FHD)
Technology: HD - TFT Color LCD
Luminosity: 400 Cd/m²
Contrast ratio: 700:1 (500:1mini)
Viewing angle: 88°

Miscellaneous

Power supply: 12 VDC to 32 VDC
Power consumption: 26 W max
Temp. Range: -20°C / +70°C (functional)
Processor: Nvidia Tegra 3
Operating System: Linux or windows Ce on demand
Qualification: RTCA DO-160G
